

**Subject:** RE: Seeking comment on a regulation impact statement on emissions from marine petrol engines [SEC=UNCLASSIFIED]

**Importance:** High

Tertius,

Thank you for your email,

Neither I nor GFAA were aware of this RIS or submissions required.

I would suggest in future your department notifies us directly of any request for comment on any matter regarding use of our oceans.

On this occasion GFAA Inc. will not offer comment other than to say we would be happy with any approach to reduce pollution of our oceans as long as the measures taken are sensible and economically feasible.

I personally would support the positions put forward by the Engine Manufacturers Association and the Boating Industry Association as they are the experts in this particular field.

Regards

Grahame A Williams  
President, GFAA Inc.
